

TIMBER DOVETAILED DRAWER BOXES

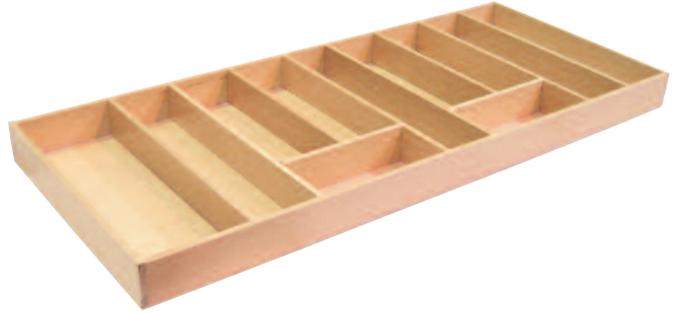

Our quality bespoke dovetailed timber drawer boxes can be manufactured to almost any size. Their front, back and sides are made from 13mm thick solid timber, sourced from sustainable forests with 6mm ply or veneered bases. They are finished in high quality acrylic

lacquer to approximately 30% sheen, which is highly resistant to most chemicals and other substances. Standard stock timbers are Beech and Oak but a variety of other timbers are also available. They can be drilled for use with BLUM Tandem full extension soft close runners.
