## TAP INTO TAILOR-MADE **BATHROOM CABINETS**

Create spa-like spaces for your clients, even where there's restricted room. Basically Trade's bathroom storage can be designed to incorporate pipes, sit under sloping eaves, and fit around bathroom suites for the best possible use of space.

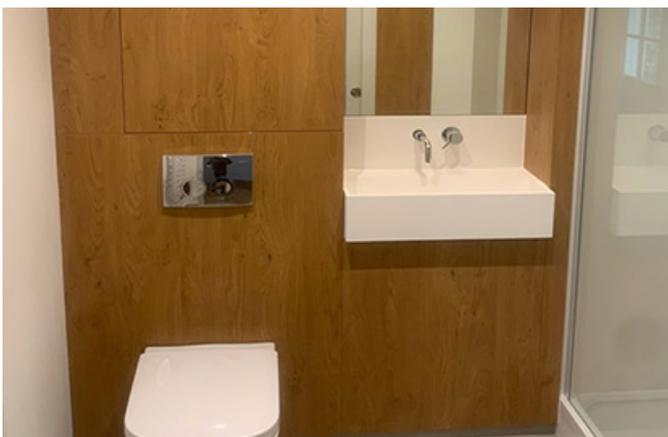

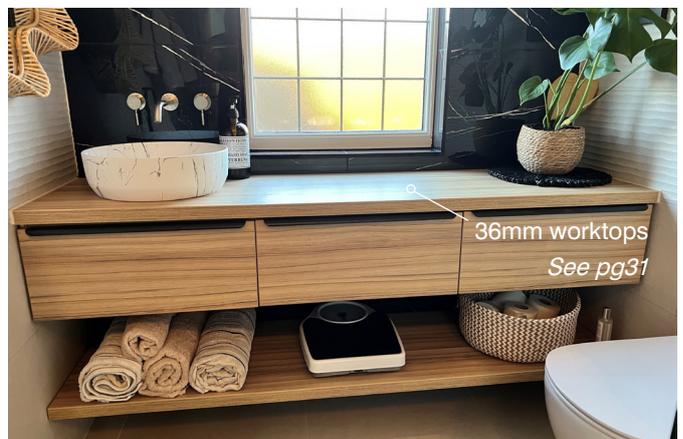

It took a full five years of research and development to unveil our own signature bathroom furniture range which was designed in partnership with industry specialists to ensure it can take your project from acceptable to exceptional.

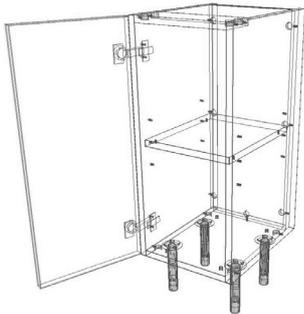

The Basically Bathrooms range is covered by our no-nonsense ten year guarantee which underlines our commitment to quality and durability. Cabinets are proudly made in Britain using sustainably grown materials.

With adjustable plinth heights from 100mm to 200mm, PVC-edged door options, and premium 6mm toughened glass shelves available, Basically Bathrooms can be designed to suit any suite.

In any finish and any colour, there are matching custom panels available, along with complementary towel rails and toilet roll holders. Pull out storage ensures that expensive cosmetics no longer get lost down the back of a conventional cabinet.
